

ADA Rail Station Assessments

Federal Transit Administration

The Federal Transit Administration (FTA) is required to ensure that new, key, and renovated rail stations comply with the requirements of the Americans with Disabilities Act (ADA).

Since 2000, the Collaborative has assessed for FTA over 850 stations at more than 46 transit agencies throughout the country. Compliance assessments involve measuring and documenting curb ramps, elevators, and accessible routes, then analyzing the findings. In the process, the Collaborative has collected, organized, and analyzed data to produce practical, management-oriented documents.
